Time Warner Telecom Wins Contracts to Deliver Voice and Data Services to MacDill Air Force Base and Kirtland Air Force Base

DENVER – June 21, 2005 - Time Warner Telecom (NASDAQ: TWTC), a leading provider of managed voice and data networking solutions for businesses, today announced that it has won two competitive bids to deliver voice and data services to MacDill Air Force Base in Tampa, Fla. and Kirtland Air Force base in Albuquerque.

Time Warner Telecom will provide to these bases 40,000 direct dial voice lines and advanced data services, adding to the existing array of services it currently supplies to the Department of Defense. The combined multi-year contracts approach \$1 million.

Time Warner Telecom delivers a robust suite of business class voice, data and Internet services over its own fiber networks built with diversity and redundancy for industry leading network availability. These types of networks and management services offer virtually fail-safe communications that are required by the U.S. military.

About Time Warner Telecom

Time Warner Telecom, headquartered in Littleton, Colo., provides managed network services, specializing in Ethernet and transport data networking, Internet access and local and long distance voice, VoIP and security to enterprise organizations and communications services companies throughout the U.S. As a leading provider of integrated and converged network solutions, Time Warner Telecom delivers customers overall economic value, quality, service and improved business productivity. With nearly 20,000 route miles of its own local and regional fiber networks, a national backbone with 10 Gbps capacity, and nearly 5,300 buildings connected directly to its fiber networks, Time Warner Telecom provides the local "last mile" of reliable communications services to customers.
