**Time Warner Telecom Extends Atlanta Fiber Network**

*Industry leading metro Ethernet, next generation services and advanced voice and data network solutions available in five additional Atlanta communities*

ATLANTA — January 20, 2006 — Time Warner Telecom Inc., (NASDAQ: TWTC), a leading provider of managed voice and data networking solutions for businesses, today announced a 130-mile extension of its fiber network to the greater Atlanta cities of Alpharetta, Smyrna, Norcross, Perimeter, and Roswell. Time Warner Telecom operates and maintains a fiber network infrastructure and a 10 Gbps IP backbone delivering state-of-the-art metro Ethernet, next generation services and integrated voice and data solutions to medium and large Atlanta-area businesses.

“This extension of our network enables us to offer converged communications solutions to more than 6,000 additional businesses located in the Atlanta area,” said Rick Brunatti, vice president and general manager for Time Warner Telecom in Atlanta. “Our expanded network can bring the highest quality, business-class voice and data services available to more than 350 commercial buildings in greater Atlanta. At the same time we can offer connectivity via our multipoint wide area networking solution to large cities in southeast and across the country”

Time Warner Telecom builds next generation networks in existing markets to downtown and suburban office park locations to meet the evolving needs of businesses. Recent extensions that have increased Time Warner Telecom’s serving area have taken place in Minneapolis/St. Paul, Phoenix, Ariz., Bellevue, Wash., and Pasadena, Calif. As of September 30, 2005, Time Warner Telecom had more than 20,000 route miles of fiber in its network. This advanced network delivers Internet, voice and data traffic at speeds of up to 10 Gbps and supports nationwide connectivity for business.
