Free & Clear Partners with Time Warner Telecom for Business Resiliency

-- Ethernet solutions pave way for expansion, scalable web services and applications--

SEATTLE, Wash. – September 11, 2006 – Time Warner Telecom Inc. (NASDAQ: TWTC), a leading provider of managed voice and data networking solutions for businesses, today announced it has contracted with Free & Clear, Inc. to provide a comprehensive suite of communication solutions including 100Mbps metro Ethernet, Ethernet Internet Services (EIS), collocation and voice services to the Seattle-based company. Free & Clear® is a provider of evidence-based tobacco cessation treatment programs for employers, health plans and government organizations.

“Time Warner Telecom offers technology that is critical to delivering our vital communications services,” said Sandy Becker, executive vice president, Free & Clear, Inc. “Time Warner Telecom is providing the tools and expertise necessary to guarantee that our customers can always contact our Quit Coaches. We look to grow with Time Warner Telecom as they provide us with a foundation for expanding our Internet-based capabilities including a robust, interactive web site.”

Time Warner Telecom is providing Free & Clear with Ethernet-based Internet service to improve productivity for employees in Seattle, Honolulu, and for those working remotely. Additionally, Free & Clear migrated its data center to one of Time Warner Telecom’s collocation sites to ensure data redundancy with seamless connectivity. A 100 Mbps native LAN Ethernet connection between its data center and the Time Warner Telecom collocation site supports Free & Clear’s ongoing business continuity and disaster recovery efforts.

“Free & Clear and its customers are experiencing faster, more reliable communications connectivity with our Ethernet-based solutions,” said David King, general manager for Time Warner Telecom in Seattle. “Seamless, reliable connections are vital to any enterprise and are especially vital to Free & Clear’s mission of helping people to quit smoking. Our ability to support their connectivity and collocation needs provides them with data access and reliability they need today and their future growth.”
