MaximumASP Selects tw telecom for Managed Data Services

- *World-class data center selects **tw telecom** to provide underlying data transport technology that it uses to deliver Web hosting and other services to its customers*

LOUISVILLE, Ky. – March 17, 2010 – **tw telecom** (NASDAQ: TWTC), a leading provider of managed voice, Internet and data networking solutions for businesses in Louisville and throughout the U.S., today announced that data center and Web hosting provider MaximumASP has selected the company to provide a 1 gigabit, dual-entry fiber connection to MaximumASP's data center.

“Our decision to select **tw telecom** to provide the advanced fiber services was an easy one,” said Wade Lewis, Managing Partner at MaximumASP. “We have seen first-hand **tw telecom**'s commitment to delivering highly reliable services with a customer-focused mindset.”

The multi-year agreement extends and expands **tw telecom**'s relationship with MaximumASP. The tw telecom services will ensure that MaximumASP customers maintain the level of connectivity they require as the data center provider continues to grow.

“MaximumASP customers range from application developers to web development companies to Fortune 500 companies that have Web hosting and colocation needs,” said Joe Paulin, vice president and general manager of **tw telecom** in Kentucky. “These customers choose MaximumASP because they know that MaximumASP offers tremendous value and reliability. We are pleased that **tw telecom** services are helping MaximumASP deliver the quality of service that has come to define the company.”

tw telecom connects more commercial buildings to its fiber network than any other competitive communications provider. In fact, it has the third highest market share of retail Ethernet ports in service. With its own metro fiber networks and one of the ten most interconnected IP backbones in the world, **tw telecom** has the national capability, robust product portfolio and national/local customer care teams to support mission critical enterprise applications and to deliver the industry's most sought after customer experience.
